

JEREMY CHON

SOFTWARE ENGINEER

Growing up playing multiple sports, I have always learned to value perseverance and respect to others. I continue to implement these values in my work as a software engineer.

RELEVANT EXPERIENCE

Projects (General Assembly)

TAMAGOTCHI

- Developed a Tamagotchi-style game that allowed for a user to interact with a pet through various action using HTML, CSS, and JS
- Designed an original character that you are able to see as you play the game

SPACE MAZE

- Created a retro-styled game that forces the user to think quickly to falling obstacles to avoid losing
- Integrated Canvas which allowed for the creation and animation of the ship and obstacles

PAINPOINT

- Built a full-stack web application with Python, React, and PostgreSQL that allows users to post issues they have with a particular industry and to create solutions for those issues

WEIGHT MATE

- Built a full-stack social fitness plan application with ExpressJS, MongoDB, and React that allows users to create workout plans and share them for accountability

EXPERIENCE

General Assembly

06/19 - 09/19

SOFTWARE ENGINEERING FELLOW

- Learned to build applications from the ground-up using key languages and frameworks
- Wrote high-quality Javascript and leverage JS libraries
- Effectively collaborated and communicated with team members to complete projects from concept to completion
- Built applications that met user needs, modeled data, and developed wireframes

CareerBuilder Employment Screening

03/18 - 04/19

PRE-FULFILLMENT SPECIALIST

- Created and edited job applicant orders to allow for a smooth verification process
- Performed extensive research to provide information needed for the verification team
